

Table of Contents

Geometric Methods in Image Processing and Computer Vision

- Curves and Surfaces

- Shape Representation, Modeling, and Recognition

- Distance and Similarity Measures and Transforms

- Digital Topology

Statistical and Stochastic Methods in Image Processing

- Image Filtering

- Image Estimation, Modeling, and Representation

- Image Segmentation

- Image Analysis, Classification, and Recognition

- Image Compression, Coding and Reconstruction

Morphology and Image Algebra

- Theoretical Developments

- Filters

- Template/Structuring Element Construction and Decomposition

- Skeleton Representation and Extraction

- Applications to Image Segmentation and Analysis

- Implementation Issues

Wavelet Applications in Image Processing

- Advances in Wavelet Theory

- Image Compression and Coding

- Image Restoration and Reconstruction

- Image Fusion and Restoration

- Feature Segmentation, Enhancement and Extraction

- Image Analysis, Object Recognition and Classification

Mathematical Methods in Image Recovery and Synthesis

- Image Reconstruction and Restoration

- Superresolution

- Inverse Methods and Ill-Posed Problems

Mathematical Methods in Geophysical Imaging

- Seismic Wave Modeling and Inversion

- Wave Equation Migration and Stacking

- Tomographic Methods

- Statistical and Stochastic Methods

- Applications of Wavelet Theory in Seismic Imaging

- Numerical Methods and Implementation Issues

1.0 Geometric Methods in Image Processing and Computer Vision

1.1 Curves and Surfaces

Geometry of digital spaces

Gabor T. Herman, [1998]

Face recognition based on depth maps and surface curvature

Gaile G. Gordon, [1991]

From points to surfaces

Pascal Fua, Peter T. Sander, [1991]

On seeing spaghetti: a novel self-adjusting seven-parameter Hough space for analyzing flexible extruded objects

John R. Kender, Rick Kjeldsen, [1991]

Role of algebraic geometry in computer vision

Gabriel Taubin, [1992]

Dynamic surfaces

Demetri Terzopoulos, [1992]

Fitting of surfaces to scattered data

Anthony D. DeRose, Hugues Hoppe, Thomas Duchamp, John Alan McDonald, Werner Stuetzle, [1992]

Reconstruction of smooth parametric surfaces from unorganized data points

Lian Fang, David C. Gossard, [1992]

Affine and projective differential geometric invariants of space curves

Alfons H. Salden, Bart M. ter Haar Romeny, Max A. Viergever, [1993]

Global surface reconstruction through regularized B-spline patches

C. S. Zhao, Roger Mohr, Long Quan, [1993]

Curvature and continuity control in particle-based surface models

Richard Szeliski, David Tonnessen, Demetri Terzopoulos, [1993]

Energy-based methods for 2D curve tracking, reconstruction, and refinement of 3D curves and applications

Benedicte Bascle, Rachid Deriche, [1993]

1.1 Curves and Surfaces (*cont.*)

Curve fitting that minimizes the mean square of perpendicular distances from sample points

Shotaro Akaho, [1993]

Ridges, ravines, and related point features on a surface

Alexander G. Belyaev, Elena V. Anoshkina, Tosiyasu L. Kunii, [1995]

Hierarchical brain mapping via a generalized Dirichlet solution for mapping brain manifolds

Sarang C. Joshi, Michael I. Miller, Gary E. Christensen, Ayananshu Banerjee, Tom Coogan, Ulf Grenander, [1995]

Spline-based deformable models

William D. K. Green, William D. K. Green, [1995]

Geometric model reconstruction from cross sections for branched structures in medical applications

Shiaofen Fang, Wieslaw L. Nowinski, Lakshmipathy Jagannathan, Rajagopalan Srinivasan, [1995]

Autonomous extraction of shape and topology of contours using geometry-driven diffusion and optimization of functionals

Eric J. Pauwels, , Peter Fiddelaers, Luc J. Van Gool, Andre J. Oosterlinck, [1995]

Object detection and measurements in medical images via geodesic deformable contours

Guillermo Sapiro, Ron Kimmel, Vicent Caselles, [1995]

How to produce a landmark point: the statistical geometry of incompletely registered images

Fred L. Bookstein, [1995]

Ridges and ravines on a surface and segmentation of range images

Alexander G. Belyaev, Ilia A. Bogaevski, Tosiyasu L. Kunii, [1997]

Differentialless geometry of plane curves

Longin Jan Latecki, Azriel Rosenfeld, [1997]

Local property of strong surfaces

Gilles Bertrand, Remy Malgouyres, [1997]

Operator based on surface curvatures for multiscale image analysis

Phongsuphap Sukanya, Ryo Takamatsu, Makoto Sato, [1998]

Contour-based shape similarity

Rolf Lakaemper, ongin Jan Latecki, Ulrich Eckhardt, [1998]

1.1 Curves and Surfaces (*cont.*)

Efficient algorithm for the detection of parabolic curves

Mohammad Zubir Mat Jafri, Farzin Deravi, [1995]

Approaches to registration using 3D surfaces

Torre D. Zuk, M. Stella Atkins, Kellogg S. Booth, [1994]

Embedded active surfaces for volume visualization

Ross T. Whitaker, David Chen, [1994]

Surface representation from photometric stereo with wavelets

Eric D. Sinzinger, Bjorn D. Jawerth, [1997]

Hierarchical shape representation and shape-preserving approximations

Emil Adrian Cornea, Mihaela-Rodica Cornea, Bjorn D. Jawerth, [1998]

1.2 Shape Representation, Modeling, and Recognition

Mathematical theories of shape: do they model perception?

David Mumford, [1991]

Local features of smooth shapes: ridges and courses

Jan J. Koenderink, Andrea J. van Doorn, [1993]

Discrete active models in vision geometry

Aziel Rosenfeld, Sandor Fejes, [1996]

Shape representation and nonrigid motion tracking using deformable superquadrics

Dimitri N. Metaxas, Demetri Terzopoulos, [1991]

Energy functions for regularization algorithms

Herve Delingette, Martial Hebert, Katsushi Ikeuchi, [1991]

Physically based and probabilistic models for computer vision

Richard Szeliski, Demetri Terzopoulos, [1991]

Adaptive snakes: control of damping and material parameters

Ramin Samadani, [1991]

Shape from contour methods using object-based heuristics

Ari David Gross, [1993]

1.2 Shape Representation, Modeling, and Recognition (*cont.*)

Role of algebraic geometry in computer vision

Gabriel Taubin, [1992]

Nonlinear shape approximation via the entropy scale space

Benjamin B. Kimia, Allen R. Tannenbaum, Steven W. Zucker, [1993]

Formulating invariant heat-type curve flows

Guillermo Sapiro, Allen R. Tannenbaum, [1993]

Fast least-squares orthogonal spline fitting and its applications to shape analysis

Eduardo Javier Rodriguez, Debora C. Vargas, Myron D. Flickner, Jorge L. C. Sanz, [1993]

Multiscale skeletal representation of images via Voronoi diagrams

R. E. Marston, Jian Cheng Shih, [1995]

Spline-based deformable models

William D. K. Green, [1995]

Autonomous extraction of shape and topology of contours using geometry-driven diffusion and optimization of functionals

Eric J. Pauwels, Peter Fiddelaers, Luc J. Van Gool, Andre J. Oosterlinck, [1995]

Shape representation using Fourier coefficients of the sinusoidal transform

Ian Pratt, [1997]

Shape study with Hough and Radon transforms

Isabelle Fillere, Marie-Jose Laboure, Jean-Marie Becker, [1998]

Contour-based shape similarity

Rolf Lakaemper, Longin Jan Latecki, Ulrich Eckhardt, [1998]

Multiscale 2-D shape representation

Peter Forte, Darrel Greenhill, [1995]

Hierarchical shape representation and shape-preserving approximations

Emil Adrian Cornea, Mihaela-Rodica Cornea, Bjorn D. Jawerth, [1998]

From invariant line features clustering to line matching: theory and applications

Djemaa Kachi, Xiaowei Tu, [1999]

1.3 Distance and Similarity Measures and Transforms

Measurement and characterization in vision geometry

Arnold W. M. Smeulders, Leo Dorst, Marcel Worring, [1997]

Modifying metrics by grouping values

Frank Rhodes, [1993]

Metrics on the face-centered cubic lattice

Alasdair McAndrew, Charles F. Osborne, [1993]

Real m-neighbor distance

P. P. Das, [1993]

Spatio-temporal curvature measures for flow-field analysis

Christoph Zetsche, Erhardt Barth, Joachim Berkmann, [1991]

Solving city block metric and digital geometry problems on the BSR model of parallel computation

Robert A. Melter, Ivan Stojmenovic, [1993]

Discrete metrics as Gomory functions

Frank Rhodes, [1993]

Defining the digital skeleton

James R. Parker, Cullen Jennings, [1993]

Fast Euclidean distance transformation in Z^n based on ordered propagation via sufficient paths

Hinnik Eggers, [1996]

Sandwich distances

Jean-Marie Becker, Dinu Coltuc, Michel Jourlin, [1997]

Sandwich distances: new results

Jean-Marie Becker, Dinu Coltuc, [1998]

Fast parallel Euclidean distance transformation in Z^n

Hinnik Eggers, [1997]

Subpixel distance maps and weighted distance transforms

Ron Kimmel, Alfred M. Bruckstein, [1993]

1.3 Distance and Similarity Measures and Transforms (cont.)

Geometrical measures of the similarity of gray-scale images

Valery V. Starovoitov, [1995]

Shape metrics from curvature-scale space and curvature-tuned smoothing

Gregory Dudek, [1991]

Metric of affine shape and motion: the intuitive interpretation in terms of the factorization method

Jun Fujiki, Takeshi Kurata, [1997]

Class of error metrics for gray-scale image comparison

Nial Friel, Ilya S. Molchanov, [1998]

Skeletonization via distance maps and level sets

Ron Kimmel, Doron Shaked, Nahum Kiryati, Alfred M. Bruckstein, [1995]

Maximum area triangle operator for edge detection

Jean-Pierre Reveilles, J. Yaacoub, [1997]

Selecting appropriate difference operators for digital images by local feature detection

Peter Veelaert, [1997]

1.4 Digital Topology

Geometry of digital spaces

Gabor T. Herman, [1998]

Well-composedness of digital sets

Longin Jan Latecki, Ulrich Eckhardt, Azriel Rosenfeld, [1993]

3D well-composed pictures

Longin Jan Latecki, [1995]

Topologically invariant methods in document image analysis

Ari David Gross, Longin Jan Latecki, [1997]

Topology of grid continua

Fridrich Sloboda, Bedrich Zatko, Reinhard Klette, [1998]

1.4 Digital Topology (*cont.*)

Simplicity surfaces: a new definition of surfaces in \mathbb{Z}^3

Michel Couprie, Gilles Bertrand, [1998]

Topological approach to image segmentation

Gilles Bertrand, Jean-Christophe Everat, Michel Couprie, [1996]

Sufficient conditions for 3D parallel thinning algorithms

Gilles Bertrand, [1995]

Algebraic methods for multidimensional digital topology

Alasdair McAndrew, Charles F. Osborne, [1993]

Problem of determining whether a parallel reduction operator for n-dimensional binary images always preserves topology

T. Yung Kong, [1993]

Local property of strong surfaces

Gilles Bertrand, Remy Malgouyres, [1997]

Digitizations preserving topological and differential geometric properties

Ari David Gross, Longin Jan Latecki, [1995]

Nearly continuous functions in digital images

Longin Jan Latecki, Frank Prokop, [1995]

Image segmentation through operators based on topology

Gilles Bertrand, Jean-Christophy Everat, Michel Couprie, [1997]

2.0 Statistical and Stochastic Methods in Image Processing

2.1 Image Filtering

Class of GOS (generalized order-statistic) filters, similar to the median, that provide edge enhancement

Harold G. Longbotham, Norman Barsalou, [1991]

Adaptive edge-preserving smoothing via adaptive-mean-field annealing

Youn-Sik Han, Wesley E. Snyder, [1992]

Synthesis of stack filters by rank selection probabilities

Ruikang Yang, Moncef Gabbouj, Yrjo A. Neuvo, [1994]

When are two weighted-order statistic filters identical?

Jaakko T. Astola, Faouzi Alaya Cheikh, Moncef Gabbouj, [1994]

Image restoration by multistage adaptive center weighted median filters

Tong Sun, Moncef Gabbouj, Yrjo A. Neuvo, [1994]

Optimization of stack filters under constraints

Pauli Kuosmanen, Karen O. Egiazarian, Jaakko T. Astola, [1995]

Optimal nonlinear filter in the random Boolean model

John C. Handley, Edward R. Dougherty, [1995]

Nonlinear filters based on ordering by FFT structure

Karen O. Egiazarian, Jaakko T. Astola, Samvel M. Atourian, David Zaven Gevorkian, [1996]

Optimal RASF filtering

Heikki Huttunen, Pauli Kuosmanen, Jaakko T. Astola, [1996]

Rank order filtering on bit-serial mesh-connected computers

Hongchi Shi, Hongzheng Li, [1996]

Adaptive smoothing of images with local weighted regression

Mark S. Levenson, David S. Bright, Jayaram Sethuraman, [1996]

Nonlinear locally adaptive and iterative algorithms of image restoration

Vladimir P. Melnik, Vladimir V. Lukin, Alexander A. Zelensky, Heikki Huttunen, Jaakko T. Astola, [1996]

2.1 Image Filtering (*cont.*)

Multifiltering approach to adaptive speckle reduction in textured SAR images

Bruno Aiazzi, Luciano Alparone, Stefano Baronti, Roberto Carla, S. Lolli, [1997]

New training method for linear separable threshold Boolean filters

Octavian Valeriu Sarca, Jaakko T. Astola, Edward R. Dougherty, [1997]

Adaptive-vector LQ filter for color image processing

Andrei A. Kurekin, Vladimir V. Lukin, Alexander A. Zelensky, Jaakko T. Astola, Pauli Kuosmanen, Kari P. Saarinen, [1997]

Mixed median filters and their properties

Artyom M. Grigoryan, [1997]

Structure-adaptive image filtering using trimmed mean filters

Roman M. Palenichka, Peter Zinterhof, [1997]

Adaptive region-based filtering of multiplicative noise

Arup Das, Rangaraj M. Rangayyan, [1997]

Novel robust rank KNN filters with impulsive noise suppression for image processing

Volodymyr I. Ponomaryov, Alexey Boleslavovich Pogrebniak, [1998]

Some statistical properties of weighted median filters

Mohit K. Prasad, Yong-Hee Lee, [1990]

2.2 Image Estimation, Modeling, and Representation

Bayesian estimation of smooth object motion using data from direction-sensitive velocity sensors

David Yushan Fong, Carlos A. Pomalaza-Raez, [1991]

Cluster approximations for statistical image processing

Chi-hsin Wu, Peter C. Doerschuk, [1993]

Multiresolution Markov random field and multigrid algorithm for a discontinuity-preserving estimation of the optical flow

Etienne Memin, Patrick Perez, [1995]

Maximum-likelihood estimation for the two-dimensional discrete Boolean model using cross-windowed observations

John C. Handley, Edward R. Dougherty, [1996]

2.2 Image Estimation, Modeling, and Representation (*cont.*)

Granulometric estimation of distorted shapes

Sinan Batman, Edward R. Dougherty, [1996]

Estimation of noise parameters on sonar images

Francoise Schmitt, Max Mignotte, Christophe Collet, Pierre Thourel, [1996]

Estimating bidirectional reflectance parameters by forward modeling and statistical inversion of remotely sensed data

Robin P. Fletcher, Howard J. Grubb, Christopher Godsalve, [1997]

Statistical estimators of spatial vector fields in defect classification and texture modeling of high-tech surfaces

Hendrik Rothe, Dorothee Hueser, [1997]

Random sets in image processing

John C. Handley, [1998]

Bayesian wavelet-based image estimation using noninformative priors

Mario Figueiredo, Robert D. Nowak, [1999]

Bayesian estimator for PET imaging using a prior image model with mixed continuity constraints

Ching-Han L. Hsu, [1999]

Approximate Poisson likelihoods for simple optimization in MAP tomographic estimation

Jean-Baptiste Thibault, Ken D. Sauer, Charles A. Bouman, [1999]

Statistical characterization of digital lines

Robert A. Melter, Ivan Stojmenovic, Jovisa Zunic, [1993]

Physically based and probabilistic models for computer vision

Richard Szeliski, Demetri Terzopoulos, [1991]

Probabilistic modeling of surfaces

Richard Szeliski, [1991]

Bayesian methods for the use of implicit polynomials and algebraic invariants in practical computer vision

Jayashree Subrahmonia, Daniel Keren, David B. Cooper, [1992]

2.2 Image Estimation, Modeling, and Representation (*cont.*)

Recursive computation of a wire-frame representation of a scene from dynamic stereo using belief functions

Arun P. Tirumalai, Brian G. Schunck, Ramesh C. Jain, [1991]

Mean-field theory for grayscale texture synthesis using Gibbs random fields

Ibrahim M. Elfadel, Alan L. Yuille, [1991]

Artificial scenes and simulated imaging

Stephen E. Reichenbach, Stephen K. Park, Rachel Alter-Gartenberg, Zia-ur Rahman, [1991]

Mean-field phase transitions for Gibbs random fields

Ibrahim M. Elfadel, Alan L. Yuille, [1992]

Topology and parameter estimation in Markov random field modeling

Xavier Descombes, Francoise Preteux, [1993]

New stochastic sampling method for region extraction: theory and experiments

Taizo Anan, Makoto Ohtsu, Hiroyuki Kudo, Tsuneo Saito, [1996]

Stochastic modeling in image segmentation

Christine Graffigne, [1998]

Graph-matching model using Gibbsian modeling: application to map/SPOT image road networks for map updating

Xavier Descombes, Christine Hivernat, Sabine Randriamasy, Josiane B. Zerubia, [1999]

Bayesian tree-structured image modeling using wavelet-domain hidden Markov models

Justin K. Romberg, Hyeokho Choi, Richard G. Baraniuk, [1999]

Model selection based on robustness criterion with measurement application

Sofiane Brahim-Belhouari, Gilles Fleury, Marie-Eve Davoust, [1999]

Optimal modeling by the use of reparameterizations

Gilles Fleury, Marie-Eve Davoust, [1999]

Multiscale hidden Markov models for photon-limited imaging

Robert D. Nowak, [1999]

2.2 Image Estimation, Modeling, and Representation (*cont.*)

Ranking in Rp and its use in multivariate image estimation

Russell C. Hardie, Gonzalo R. Arce, [1990]

Least statistically dependent basis and its application to image modeling

Naoki Saito, [1998]

2.3 Image Segmentation

Considering multiple-surface hypotheses in a Bayesian hierarchy

Steven M. LaValle, Seth A. Hutchinson, [1991]

Image segmentation with genetic algorithms: a formulation and implementation

Gunasekaran Seetharaman, Amruthur Narasimhan, Anand Sathe, Lisa Storck, [1991]

Using the Dempster-Shafer reasoning model to perform pixel-level segmentation on color images

Matt G. Payne, Qiuming Zhu, Yinghua Huang, [1992]

Two modified crossover and mutation operators for image segmentation by genetic algorithms

Gunasekaran Seetharaman, Obili Sai Prabhu, Amruthur Narasimhan, [1992]

Variational versus Markov random field methods for image segmentation

Sanjeev R. Kulkarni, S. K. Mitter, [1994]

Texture-based segmentation using Markov random field models

Chi-hsin Wu, Peter C. Doerschuk, [1994]

Hierarchical method for the detection of moving objects in a sequence of images

Wei Xiong, Wei Xiong, Christine Graffigne, Christine Graffigne, [1995]

Convergence of unsupervised image segmentation algorithms

Chee Sun Won, [1995]

Mine boundary detection using partially ordered Markov models

Xia Hua, Jennifer L. Davidson, Noel A. C. Cressie, [1997]

Color segmentation in the HSI color space using the K-means algorithm

Arthur Robert Weeks, G. Eric Hague, [1997]

2.3 Image Segmentation (*cont.*)

Sonar picture segmentation using Markovian multigrid or multiresolution algorithms

Christophe Collet, Pierre Thourel, Patrick Perez, Patrick Bouthemy, [1997]

Multiscale autoregressive image representation for texture segmentation

Pierre-Martin Tardif, Andre Zaccarin, [1997]

Fast algorithm for region snake-based segmentation adapted to physical noise models and application to object tracking

Christophe Chesnaud, Philippe Refregier, [1999]

Three-dimensional partial volume segmentation of multispectral magnetic resonance images using stochastic relaxation

Brian Johnston, M. Stella Atkins, Kellogg S. Booth, [1994]

2.4 Image Analysis, Classification, and Recognition

Hierarchical Markov random field models applied to image analysis: a review

Christine Graffigne, Fabrice Heitz, Patrick Perez, Francoise Preteux, Marc Sigelle, Josiane B. Zerubia, [1995]

Bayesian matching technique for detecting simple objects in heavily noisy environment

John S. Baras, Emmanuel N. Frantzeskakis, [1991]

Evidential reasoning based on Dempster-Shafer theory and its application to medical image analysis

Shiuh-Yung James Chen, Wei-Chung Lin, Chin-Tu Chen, [1993]

Matching of road segments using probabilistic relaxation: a hierarchical approach

W. J. Christmas, Josef Kittler, Maria Petrou, [1994]

Texture analysis using genetic algorithms and partially ordered Markov models

Jennifer L. Davidson, Xia Hua, Dan Ashlock, [1995]

Improved dynamic programming-based handwritten word recognition using optimal order statistics

Wen-Tsong Chen, Paul D. Gader, Hongchi Shi, [1997]

Multispectral image classification using a mixture density model

Sylvia S. Shen, Brian D. Horblit, [1992]

2.4 Image Analysis, Classification, and Recognition (*cont.*)

Algorithm for classification of multispectral data and its implementation on a massively parallel computer

Behzad M. Shahshahani, David A. Landgrebe, [1993]

Multitarget discrimination with linear signal decomposition/direction of arrival-based ATR

Barry K. Hill, David Cyganski, Richard F. Vaz, [1996]

Genetic algorithms for texture model identification and synthesis

Cory J. Engebretson, Jennifer L. Davidson, Dan Ashlock, [1996]

Expanded Dempster-Shafer reasoning technique for image feature integration and object recognition

Qiuming Zhu, Yinghua Huang, Matt G. Payne, [1992]

Hierarchical method for the detection of moving objects in a sequence of images

Wei Xiong, Christine Graffigne, [1995]

Noisy fractional Brownian motion for detection of perturbations in regular textures

Herve Guillemet, Habib Benali, Francoise Preteux, Robert Di Paola, [1996]

Progressive classification scheme for document layout recognition

Julia Minguillon, Jaume Pujol, Kenneth Zeger, [1999]

Stochastic approach to texture analysis using probabilistic neural networks and Markov random fields

Jamshid Dehmeshki, M. Farhang Daemi, Fraser N. Hatfield, Mehdi Rashidi, [1997]

Velocital information feature for charting spatio-temporal changes in digital image sequences

Gregory J. Power, Mohammad A. Karim, Farid Ahmed, [1999]

2.5 Image Compression, Coding and Reconstruction

Hierarchical statistical models for the fusion of multiresolution image data

Jean-Marc Laferte, Fabrice Heitz, Patrick Perez, Eric Fabre, [1995]

Lossless compression of multispectral SPOT images

Gerard Mozelle, Francoise Preteux, Catalin Iulian Fetita, Francois Cabot, [1997]

Stochastic approach for motion vector estimation in video coding

Sungook Kim, C. -C. Jay Kuo, [1994]

2.5 Image Compression, Coding and Reconstruction (*cont.*)

Noncausal predictive image coding

Peifang Zhou, [1995]

General method for accelerating simulated annealing algorithms for Bayesian image restoration

Griff L. Bilbro, [1991]

Robust regularized image restoration

Taek-Mu Kwon, Michael E. Zervakis, [1991]

Nonlinear multigrid methods of optimization in Bayesian tomographic image reconstruction

Charles A. Bouman, Ken D. Sauer, [1992]

Restoration and fusion of laser-range camera images

Martin Beckerman, Frank J. Sweeney, [1992]

Quasi-static algorithm for image restoration preserving discontinuities

Donald Prevost, Philippe Lalanne, Line Garnero, Pierre H. Chavel, [1994]

Simultaneous restoration and segmentation using cluster approximations to Markov random fields

Chi-hsin Wu, Peter C. Doerschuk, [1995]

Adaptive Markovian model for 3D x-ray vascular reconstruction

Etienne P. Payot, Francoise Preteux, Regis Guillemaud, Yves L. Trouset, [1995]

Spatially adaptive local-feature-driven total variation minimizing image restoration

David M. Strong, Peter Blomgren, Tony F. Chan, [1997]

Minimum-description-length-based approach to CT reconstruction using truncated projections from objects with unknown boundaries

Tetsuya Yuasa, Balasigamani Devaraj, Yuuki Watanabe, Tomoo Sato, Yoshiaki Sasaki, Atsunori Hoshino, Humio Inaba, Takao Akatsuka, [1997]

Approximate Poisson likelihoods for simple optimization in MAP tomographic estimation

Jean-Baptiste Thibault, Ken D. Sauer, Charles A. Bouman, [1999]

Penalized-likelihood image reconstruction for emission tomography using higher-order convex-nonquadratic priors

Sofiane Brahim-Belhouari [1999]

3.0 Morphology and Image Algebra

3.1 Theoretical Developments

Recursive operations in image algebra

Dong Li, Gerhard X. Ritter, [1990]

Hexagonal tessellations in image algebra

David H. Eberly, Dennis J. Wenzel, Harold G. Longbotham, [1990]

Affine morphology and affine signal models

Petros Maragos, [1990]

Analysis of noise attenuation in morphological image processing

Lasse Koskinen, Jaakko T. Astola, Yrjo A. Neuvo, [1991]

New trends in morphological algorithms

Luc M. Vincent, [1991]

Lipschitz lattices and numerical morphology

Jean C. Serra, [1991]

New concepts in mathematical morphology: the topographical and differential distance functions

Francoise Preteux, Nicolas Merlet, [1991]

Heterogeneous matrix products

Gerhard X. Ritter, [1991]

Set discrimination analysis tools for grey-level morphological operators

Robert C. Vogt, [1991]

Statistical morphology

Alan L. Yuille, Luc M. Vincent, Davi Geiger, [1991]

Two inverse problems in mathematical morphology

Michel Schmitt, [1991]

Decomposition and inversion of von Neumann-like convolution operators

Zohra Z. Manseur, Zohra Z. Manseur, David C. Wilson, David C. Wilson, [1991]

3.1 Theoretical Develoments (*cont.*)

Advanced mathematical morphology: from an algebraic to a stochastic point of view

Francoise Preteux, [1992]

Simulated annealing and morphology neural networks

Jennifer L. Davidson, [1992]

Minimax eigenvalue transform

Gerhard X. Ritter, Peter Sussner, [1992]

New measure of contrast: the dynamics

Michel Grimaud, [1992]

Structural description of images using image algebra

Hongchi Shi, Gerhard X. Ritter, [1992]

Differential inclusions for mathematical morphology

Juliette Mattioli, [1993]

Binary random fields, random set theory, and the morphological analysis of shape

John Ioannis Goutsias, [1993]

Statistical morphology

Robert M. Haralick, Edward R. Dougherty, Jaekyu Ha, Tapas Kanungo, S. Karasu, Chang Kyu Lee, Larry R. Rystrom, Visvanathan Ramesh, Ihsin T. Phillips, [1993]

Polarization imaging through scattering media

Stephen P. Morgan, Manping Khong, Michael G. Somekh, [1995]

Differential geodesic mathematical morphology

Nicolas F. Rougan, Francoise Preteux, [1999]

3.2 Filters

Role of shape in morphological bases for digital moving-average filters

Edward R. Dougherty, Eugene J. Kraus, [1990]

Decomposition of separable and symmetric convex templates

Dong Li, Gerhard X. Ritter, [1990]

B-code dilation and structuring element decomposition for restricted convex shapes

Tapas Kanungo, Robert M. Haralick, Xinhua Zhuang, [1990]

3.2 Filters (*cont.*)

Decomposition techniques for gray-scale morphological templates

Paul D. Gader, Samer Takriti, [1990]

Local decomposition of invariant lattice transforms

Jennifer L. Davidson, [1990]

Decomposition methods for convolution operators II

Zohra Z. Manseur, David C. Wilson, [1990]

Conditional-expectation-based implementation of the optimal mean-square binary morphological filter

Edward R. Dougherty, Athimootil V. Mathew, Vivek Swarnakar, [1991]

Hierarchical image decomposition based on modeling of convex hulls corresponding to a set of order statistic filters

Ari M. Vepsalainen, Seppo Linnainmaa, Olli Yli-Harja, [1991]

Soft morphological filters

Lasse Koskinen, Jaakko T. Astola, Yrjo A. Neuvo, [1991]

Morphological filter mean-absolute-error theorem

Robert P. Loce, Edward R. Dougherty, [1992]

Statistical properties of soft morphological filters

Lasse Koskinen, Jaakko T. Astola, [1992]

Connectivity filters for image sequences

Montse Pardas, Jean C. Serra, Luis Torres, [1992]

Floating stack arrays: a unified representation of linear and morphological filters

Stephen S. Wilson, [1992]

Optimal morphological hit-or-miss filtering of gray-level images

Edward R. Dougherty, [1993]

Representation of finite-range increasing filters in the context of computational morphology

Edward R. Dougherty, Divyendu Sinha, [1993]

3.2 Filters (*cont.*)

Nonlinear filtering technique for the extraction of quasi-linear features from images

Robert E. Hall, [1993]

Multilayer Boolean and stack filter design

Ioan Tabus, Doina Petrescu, Moncef Gabbouj, [1994]

Median and morphological scale space filtering and zero-crossings

J. Andrew Bangham, [1994]

Properties of multiscale morphological filters, namely, the morphology decomposition theorem

Pierre Chardaire, J. Andrew Bangham, C. Jeremy Pye, DeQuan Wu, [1994]

Morphological filter design with genetic algorithms

Rudolf Ehrhardt, [1994]

Optimization of soft-morphological filters by genetic algorithms

Heikki Huttunen, Pauli Kuosmanen, Lasse Koskinen, Jaakko T. Astola, [1994]

Document enhancement via binary to gray-scale iterative stack filters

Ronald E. Jodoin, Robert P. Loce, R. Victor Klassen, [1995]

Stack filters: relating fuzzy theory to mathematical morphology and order statistics

Joseph A. Rea, Harold G. Longbotham, Hemal Kothari, [1995]

Self-consistent mathematical morphological filter for removing cirrus noise from far-infrared astronomical images

Lun X. He, John P. Basart, Philip N. Appleton, Jeffrey A. Pedelty, [1995]

3.3 Template/Structuring Element Construction and Decomposition

Automatic generation of morphological template features

Andrew M. Gillies, [1990]

Gradient descent techniques for feature detection template generation

William F. Pont, Paul D. Gader, [1991]

Template generation for pattern classification

Paul D. Gader, [1992]

Adaptive resonance theory and self-organizing morphological kernels

John P. Sharpe, Nilgun Sungar, Kristina M. Johnson, [1994]

Learning the identity with basic morphological operators (potato peeler algorithm)

Juliette Mattioli, Michel Schmitt, [1994]

Analysis of morphological structuring elements generated using adaptive resonance theory

John P. Sharpe, Nilgun Sungar, Romkumar Narayanswamy, Kristina M. Johnson, [1995]

Finding optimal convex gray-scale structuring elements for morphological multiscale representation

Aldo W. Morales, Sung-Jea Ko, [1996]

Indecomposability problem in mathematical morphology

Pijush K. Ghosh, Robert M. Haralick, [1993]

Quadtree decomposition of binary structuring elements

Kenji Shoji, [1991]

Decomposition of separable and symmetric convex templates

Dong Li, Gerhard X. Ritter, [1990]

Decomposition techniques for gray-scale morphological templates

Paul D. Gader, Samer Takriti, [1990]

Local decomposition of invariant lattice transforms

Jennifer L. Davidson, [1990]

Decomposition methods for convolution operators II

Zohra Z. Manseur, David C. Wilson, [1990]

Max-polynomials and template decomposition

Dong Li, [1991]

3.3 Template/Structuring Element Construction and Decomposition (*cont.*)

Template decomposition and inversion over hexagonally sampled images

Dean Lucas, Laurie Gibson, [1991]

Decomposition and inversion of von Neumann-like convolution operators

Zohra Z. Manseur, David C. Wilson, [1991]

Decomposition of morphological structure element in hexagon lattice

Wei Gong, Qing Yun Shi, [1993]

3.4 Skeleton Representation and Extraction

Spatially variant morphological skeleton representation

Mohammed A. Charif-Chefchaoui, Dan Schonfeld, [1994]

Skeletons and watershed lines in digital spaces

Fernand Meyer, [1990]

Skeleton decompositions

Jean C. Serra, [1992]

Binary image segmentation using weighted skeletons

Hugues Talbot, Ivan R. Terol Villalobos, [1992]

Image cellular complexes, morphological operators, and skeletonization

Michael Pyeron, Oleh Tretiak, [1993]

New descriptor for skeletons of planar shapes: the calypter

Eric Pirard, Jean-Francois Nivart, [1994]

Skeletonization via vertices of morphologically decomposed subsets

Dongming Zhao, Xintong Zhang, [1995]

3.5 Applications to Image Segmentation and Analysis

Segmentation tools in mathematical morphology

Serge Beucher, [1990]

Application of a conditional digital erosion operator in automated segmentation of the anatomy in MR images of the lower spine

Dennis P. Pfeifer, Michael P. Chwialkowski, Peter E. Shile, Robert W. Parkey, Ronald M. Peshock, [1990]

3.5 Applications to Image Segmentation and Analysis (*cont.*)

Adaptive morphological multiresolution decomposition

Philippe Salembier, Laurent Jaquenoud, [1991]

Image analysis using threshold reduction

Dan S. Bloomberg, [1991]

Deformable markers: mathematical morphology for active contour models control

Nicolas Francis Rougon, Francoise Preteux, [1991]

Watershed segmentation of binary images using distance transformations

Curt L. Orbert, Ewert W. Bengtsson, Bo G. Nordin, [1993]

Image component labeling using local operators

Hongchi Shi, Gerhard X. Ritter, [1993]

Fast binary segmentation of gray-level images using a morphological operator

Roman M. Palenichka, Peter Zinterhof, [1995]

Morphological approach to multiband synthetic aperture radar (SAR) image segmentation

Silvina J. Loccisano, Marta Mejail, Julio Cesar Jacobo-Berlles, [1996]

Application of mathematical morphology to the study of microstructural characteristics of metal matrix composites

Mathew S. Chackalackal, John P. Basart, [1990]

Multiscale analysis based on mathematical morphology

Yi Lu, Robert C. Vogt, [1991]

Morphological algorithm for ridge extraction in fingerprint images

Charles D. Lake, Robert M. Loughheed, James H. Beyer, [1993]

Multiscale isotropic morphology and shape approximation using the Voronoi diagram

Jonathan W. Brandt, [1993]

Quantitative automated analysis of cornea endothelial cell images

Nicolas Francis Rougon, Francoise Preteux, Gilles Renard, [1994]

Fuzzy image algebra neural networks for target classification

Rashmi Srivastava, Jennifer L. Davidson, [1994]

3.5 Applications to Image Segmentation and Analysis (*cont.*)

Image algebra networks for pattern classification

Paul D. Gader, Yonggwan Won, Mohamed A. Khabou, [1994]

Image features extraction using mathematical morphology

Marcin Iwanowski, Slawomir Skoneczny, Jaroslaw Szostakowski, [1997]

Video tracking using morphological pyramids

C. Andrew Segall, Wei Chen, Scott T. Acton, [1999]

Modeling, segmentation, and caliber estimation of bronchi in high-resolution computerized tomography

Francoise Preteux, Catalin I. Fetita, Andre Capderou, Philippe Grenier [1999]

Morphological algorithm for detecting dominant points on digital curves

Xintong Zhang, Dongming Zhao, [1995]

Mathematical morphology tools for 3D image analysis of porous media

Ulisses M. Braga-Neto, Roberto de Alencar Lotufo, [1995]

Erosion- and dilation-based morphological signature transform for shape description

Zoran Dukic, Sven Loncaric, [1997]

Detection of local objects in radiographic images by structural hypothesis-testing approach

Roman M. Palenichka, Peter Zinterhof, [1997]

Straight-line extraction in binary drawings using morphological operations

Edward K. Wong, Yu Chen, Syng-Yup Ohn, [1998]

Efficient morphological processing of maps and line drawings based on directional interval coding

Gady Agam, Javier Frydman, Oren Amiram, Its'hak Dinstein, [1997]

OCR based on mathematical morphology

Junior Barrera, Routo Terada, Roberto de Alencar Lotufo, Nina S. T. Hirata, Roberto Hirata, F. A. Zampiroli, [1998]

3.6 Implementation Issues

Environment for the automatic manipulation and analysis of morphological expressions

Craig H. Richardson, Ronald W. Schafer, [1990]

Images and image domains in Image Algebra Ada

Michael F. Yoder, [1990]

Architecture of the parallel recirculating pipeline

William W. Wehner, James Brandt, [1990]

Efficient VLSI algorithm and an implementation architecture for gray-scale morphology

Sung-Jea Ko, Malayappan Shridhar, [1990]

Optical morphological processors

David P. Casasent, [1990]

Parallel architectures for binary image algebra

Kung-Shiuh Huang, [1990]

Introduction to Image Algebra Ada

Joseph N. Wilson, [1991]

Object-oriented language for image and vision execution

Myron D. Flickner, Mark A. Lavin, Sujata Das, [1991]

Image algebra preprocessor for the MasPar parallel computer

Trevor E. Meyer, Jennifer L. Davidson, [1991]

Electro-optical image processing architecture for implementing image algebra operations

Patrick C. Coffield, [1991]

Optical gray-scale morphology for target detection

David P. Casasent, Roland H. Schaefer, [1991]

Image algebra algorithm development environment

Cathryn M. Belisle, Pamela A. Horner, [1992]

ADA interpretative system for image algebra

Juan Jose Murillo, Joseph N. Wilson, [1992]

Architecture for processing image algebra operations

Patrick C. Coffield, [1992]

3.6 Implementation Issues (*cont.*)

Supporting image algebra in the C++ language

Joseph N. Wilson, [1993]

Prototype coprocessor for image algebra operations

Patrick C. Coffield, Matthew B. Scudiere, [1993]

Interpretive programming language for image algebra

Arthur Robert Weeks, Harley R. Myler, L. D. Cinci, [1994]

Using templates and neighborhoods: practical considerations and formal observations

Joseph N. Wilson, Robert H. Forsman, [1994]

Mathematical morphology toolbox for the KHOROS system

Junior Barrera, Gerald Jean Franc Banon, Roberto de Alencar Lotufo, [1994]

Fast opening functions and morphological granulometries

Luc M. Vincent, [1994]

Morphological feature detection for cervical cancer screening

Romkumar Narayanswamy, John P. Sharpe, Heather J. Duke, Rosemary J. Stewart, Kristina M. Johnson, [1995]

Optical implementation of morphological hit-miss transform using complementary encoding

Shifu Yuan, Minxian Wu, Guofan Jin, Yingbai Yan, Jianhong Cai, [1995]

4.0 Wavelet Applications in Image Processing

4.1 Advances in Wavelet Theory

Adapted waveform analysis, wavelet packets, and local cosine libraries as a tool for image processing

Ronald R. Coifman, [1993]

Gabor transform: theory and computations

Jie Yao, [1993]

Local discriminant bases

Naoki Saito, Ronald R. Coifman, [1994]

Oblique projections in discrete signal subspaces of l_2 and the wavelet transform

Akram Aldroubi, Michael A. Unser, [1994]

Discrete biorthogonal wavelets and PR finite impulse response (FIR) filter banks via block circulant matrices

Jaroslav Kautsky, Radka Turcáková, [1994]

Finite element multiwavelets

Vasily Strela, Gilbert Strang, [1994]

Design of regular 2D nonseparable wavelets/filter banks using transformations of variables

David B. H. Tay, Nick G. Kingsbury, [1994]

Class of smooth nonseparable N-dimensional scaling functions

Mohsen Maesumi, [1994]

Orthogonal multiwavelets with vanishing moments

Gilbert Strang, Vasily Strela, [1994]

Refinement of fast wavelet-based algorithms for linear initial value problems

Stanley Osher, A. Jiang, Bjorn Engquist, [1994]

Matching pursuit of images

François Bergeaud, Stéphane G. Mallat, [1995]

Multiresolution analysis on nonsmooth sets with applications

Bjorn D. Jawerth, Gunnar Peters, [1995]

4.1 Advances in Wavelet Theory (*cont.*)

Generalized Haar function systems, digital nets, and quasi-Monte Carlo integration

Karl Entacher, [1996]

Oblique and biorthogonal multiwavelet bases with fast-filtering algorithms

Akram Aldroubi, Jill McGowan, [1995]

General Hilbert space framework for the discretization of continuous signal processing operators

Michael A. Unser, [1995]

Lattice structure for multifilters derived from complex-valued scalar filter banks

Kurt N. Johnson, Truong Q. Nguyen, [1996]

Oblique multiwavelet bases: examples

Akram Aldroubi, [1996]

Logical wavelets

Premkumar S. Natarajan, Joseph P. Noonan, Sos S. Agaian, [1997]

Recent results in wavelet applications

Ingrid Daubechies, [1998]

Hermite spline multiwavelets for image modeling

Radka Turcajova, [1998]

Characterizations of wavelet bases and frames in Hilbert spaces

S. L. Lee, W. S. Tang, [1997]

Two-dimensional multi-Gabor representations

Shidong Li, [1997]

Examples of bivariate nonseparable continuous compactly supported orthonormal wavelets

Wenjie He, Mingjun Lai, [1997]

Unified view on filter banks

Andreas Klappenecker, Matthias Holschneider, [1998]

Comparison of wavelets from the point of view of their approximation error

Michael A. Unser, Thierry Blu, [1998]

Digital filters associated with bivariate box spline wavelets

Wenjie He, Mingjun Lai, [1997]

4.2 Image Compression and Coding

Image coding using the embedded zerotree wavelet algorithm

Jerome M. Shapiro, [1993]

Hybrid technique using spline-wavelet packets and vector quantization for high-rate image compression

Qian L. Fridley, Andrew K. Chan, Charles K. Chui, Elaine J. Pettit, Don S. Rhines, [1993]

Local cosine transform: a method for the reduction of the blocking effect in JPEG

G. Aharoni, Amir Averbuch, Ronald R. Coifman, M. Israeli, [1993]

Wavelet and subband coding of images: a comparative study

Frank H. Hartung, John Hakon Husoy, [1993]

Compression of gray-scale fingerprint images

Thomas Hopper, [1994]

New folding operators for image compression

Bjorn D. Jawerth, Yi Liu, Wim Sweldens, [1994]

Digital image compression using wavelets and wavelet packets based on nonstationary and inhomogeneous multiresolution analyses

Andreas Uhl, [1994]

Wavelet transform approach to video compression

Jin Li, Po-Yuen Cheng, C. -C. Jay Kuo, [1995]

Adaptive self-quantization of wavelet subtrees: a wavelet-based theory of fractal image compression

Geoffrey M. Davis, [1995]

Image compression with embedded wavelet coding via vector quantization

Ioannis Katsavounidis, C. -C. Jay Kuo, [1995]

Evolving better wavelet compression schemes

Andreas Klappenecker, Frank U. May, [1995]

Embedded wavelet packet transform technique for texture compression

Jin Li, Po-Yuen Cheng, C. -C. Jay Kuo, [1995]

Segmentation-based wavelet transform for still-image compression

Gerard Mozelle, Abdellatif Seghier, Francoise Preteux, [1996]

4.2 Image Compression and Coding (*cont.*)

Multiwavelet-transform-based image compression techniques

Sathyanarayan S. Rao, Sung H. Yoon, Deepak Shenoy, [1996]

Region-based wavelet image compression

Kelly R. Debure, Michael L. Hilton, [1996]

Space-frequency adaptive trellis-coded wavelet image coding

Veyis Nuri, [1996]

Integrated wavelet compression and restoration

Zia-ur Rahman, [1996]

Lossless compression of medical images based on an enhanced generalized multidimensional S-Transform

Bruno Aiazzi, Pasquale S. Alba, Luciano Alparone, Stefano Baronti, Franco Lotti, [1996]

Understanding wavelet image compression

Stephane G. Mallat, Frederic Falzon, [1997]

Joint optimization of lattice vector quantizer and entropy coder in subband coding

Won-Ha Kim, Yu-Hen Hu, Truong Q. Nguyen, [1997]

Lossless image compression using wavelets over finite rings and related architectures

Andreas Klappenecker, Frank U. May, Armin Nueckel, [1997]

Orthogonal and biorthogonal multiwavelets for signal denoising and image compression

Vasily Strela, Andrew T. Walden, [1998]

Multilayered image compression

Francois G. Meyer, Amir Z. Averbuch, Jan Olov Stromberg, Ronald R. Coifman, [1998]

Lossless compression of 3D MRI and CT data

Andreas Klappenecker, Frank U. May, Thomas Beth, [1998]

Wavelets: approximation and compression - a review

Martin Vetterli, [1999]

4.3 Image Restoration and Reconstruction

Multiscale method for tomographic reconstruction

Mickey Bhatia, William Clem Karl, Alan S. Willsky, [1993]

Restoring shapes of noisy curves

Harvey Diamond, Louise A. Raphael, Daniel Williams, [1994]

Reconstruction of inverse synthetic aperture radar image using adaptive time-frequency wavelet transform

Victor C. Chen, [1995]

Wavelet transform for local tomography reconstruction

Harold H. Szu, Joseph T. DeWitte, Joseph P. Garcia, Brian A. Telfer, Tim E. Olson, Dennis M. Healy, Rui J. P. deFigueiredo, [1995]

Stabilized inversion for limited angle tomography

Tim E. Olson, [1995]

Local adaptive image restoration and enhancement with the use of DFT and DCT in a running window

Leonid P. Yaroslavsky, [1996]

High-resolution satellite image restoration with frames

Jerome Kalifa, Stephane G. Mallat, Frederic Falzon, Bernard Rouge, [1996]

Laser-ultrasound imaging of defects in carbon fiber composite materials

C. M. Chen, Q. Shan, Richard J. Dewhurst, [1996]

Wavelet operators and their applications in computerized tomography

Shiying Zhao, Ge Wang, [1997]

4.4 Image Fusion and Restoration

Multiresolution image registration procedure using spline pyramids

Michael A. Unser, Akram Aldroubi, Charles R. Gerfen, [1993]

Efficient data fusion using wavelet transform: the case of SPOT satellite images

Thierry Ranchin, Lucien Wald, Marc Mangolini, [1993]

Wavelets and image fusion

Laure J. Chipman, Timothy M. Orr, Lewis N. Graham, [1995]

4.4 Image Fusion and Restoration (*cont.*)

Automatic registration of images by a wavelet-based multiresolution approach

Jean-Christophe Olivo, J. Deubler, Christian Boulin, [1995]

Hierarchical multiresolution technique for image registration

Radka Turcajova, Jaroslav Kautsky, [1996]

General stereo image matching using symmetric complex wavelets

He-Ping Pan, [1996]

Constraints in the wavelet transform domain for stereo vision correspondence matching

Sheng Zhong, Harold H. Szu, Francis Chin, Qing Yun Shi, [1996]

Pyramid-based multisensor image data fusion

Bruno Aiazzi, Luciano Alparone, Stefano Baronti, Roberto Carla, Leonardo Mortelli, [1997]

Spline pyramids for intermodal image registration using mutual information

Philippe Thevenaz, Michael A. Unser, [1997]

Optimal wavelet decomposition of wire-frame meshes using box splines

Michael G. Strintzis, Sotiris Malassiotis, [1997]

Image registration based on complex wavelet pyramid and HVS modeling

Paul Bao, Dan Xu, [1998]

4.5 Feature Segmentation, Enhancement and Extraction

Wavelet-based approaches versus subband coding techniques for still-image coding

Manuel A. Sola, Sebastia Sallent-Ribes, [1994]

Image segmentation using phase coding and wavelet transform

Daniel G. Hennequin, Jacques Lewandowski, [1994]

Adaptive approach for texture segmentation by multichannel wavelet frames

Andrew F. Laine, Jian Fan, [1993]

Edge localization in images by symmetrical wavelet transforms

Mingui Sun, Ching-Chung Li, Robert J. Sclabassi, [1993]

Nonorthogonal wavelet edge detector with four filter-coefficients

HyungJun Kim, Ching-Chung Li, [1993]

Image segmentation by multiresolution histogram decomposition

Ramana L. Rao, Lakshman Prasad, [1995]

4.5 Feature Segmentation, Enhancement and Extraction (*cont.*)

Character extraction from documents using wavelet maxima

Wen L. Hwang, Fu Chang, [1996]

Frame of wavelets for edge detection

Frederic Truchetet, Olivier Laligant, E. Bourenanne, J. Miteran, [1994]

Contrast enhancement of medical images using multiscale edge representation

Jian Lu, Dennis M. Healy, John B. Weaver, [1994]

Reduced motion artifacts in magnetic resonance imaging by adaptive spatiotemporal multiresolution reconstruction

Dennis M. Healy, Tim E. Olson, John B. Weaver, [1994]

Steerable dyadic wavelet transform and interval wavelets for enhancement of digital mammography

Andrew F. Laine, Iztok Koren, Wuhai Yang, Fred J. Taylor, [1995]

Image enhancement with symmetric Daubechies wavelets

Jean-Marc Lina, Langis Gagnon, [1995]

Multiscale image features analysis with circular harmonic wavelets

Giovanni Jacovitti, Alessandro Neri, [1995]

Multiscale suboctave wavelet transform for denoising and enhancement

Andrew F. Laine, Xuli Zong, [1996]

Local adaptive image restoration and enhancement with the use of DFT and DCT in a running window

Leonid P. Yaroslavsky, [1996]

2D multirate Bayesian framework for multiscale feature detection

Hazem M. Hajj, Truong Q. Nguyen, Roland T. Chin, [1996]

Multiscale merging by a mixed approach for edge detection

Olivier Laligant, Frederic Truchetet, [1996]

Speckle filtering by wavelet analysis and synthesis

Katia Lebart, Jean-Marc Boucher, [1996]

Adaptive mammographic image feature enhancement using wavelet-based multiresolution analysis

Lulin Chen, Chang Wen Chen, Kevin J. Parker, [1996]

4.5 Feature Segmentation, Enhancement and Extraction (*cont.*)

Multiscale Gabor wavelet fusion for edge detection in microscopy images

Ashit Talukder, David P. Casasent, [1998]

Speckle filtering of SAR images: a comparative study between complex-wavelet-based and standard filters

Langis Gagnon, Alexandre Jouan, [1997]

Improved wavelet denoising via empirical Wiener filtering

Sandeep P. Ghael, Akbar M. Sayeed, Richard G. Baraniuk, [1997]

Extraction of urban network from high-spatial-resolution imagery using multiresolution analysis and wavelet transform

Isabelle Couloigner, Thierry Ranchin, [1998]

Multiwavelet-based feature extraction for MRI segmentation

Reza Nezafat, Hamid Soltanian-Zadeh, [1998]

Adaptive feature enhancement for mammographic images with wavelet multiresolution analysis

Lulin Chen, Chang W. Chen, Kevin J. Parker, [1997]

4.6 Image Analysis, Object Recognition and Classification

Gabor-wavelet pyramid for the extraction of image flow

Victor C. Chen, Tien-Ren J. Tsao, [1993]

Computing optical flow using a discrete, spatio-temporal, wavelet multiresolution analysis

Thomas J. Burns, Steven K. Rogers, Mark E. Oxley, Dennis W. Ruck, [1994]

Disparity analysis in remotely sensed images transform

Jean-Pierre Djamdjji, Albert Bijaoui, [1995]

On-line handwriting analysis using wavelets

Geetha Srikantan, Rohini K. Srihari, [1995]

Motion estimation using complex wavelets

Julian Magarey, Nick G. Kingsbury, [1996]

Wavelet-based deformable contour and its application to detection of pulmonary nodules on chest radiographs

Hiroyuki Yoshida, Shigehiko Katsuragawa, Yali Amit, Kunio Doi, [1997]

4.6 Image Analysis, Object Recognition and Classification (*cont.*)

Continuous wavelet transform for oriented texture analysis

Nacera Zegadi, Francoise Peyrin, Robert Goutte, [1997]

Multiscale B-spline snakes for general contour detection

Patrick Brigger, Michael A. Unser, [1998]

Pattern recognition of industrial defects by multiresolution analysis with wavelet decomposition

Denis Deguillemont, Stephane Lecoeuche, Jean-Paul Dubus, [1998]

Multiscale approaches to target tracking in image sequences

Thomas G. Allen, Mark R. Luetttgen, Alan S. Willsky, [1994]

Optoelectronic processing of wide-bandwidth coherent laser radar signals

Stuart Fowler, Tim A. Patterson, Howard W. Halsey, D. Greg Lawson, Kerry B. Whittle, Gary W. Kamerman, [1994]

Multidimensional wavelets for target detection and recognition

Sang-Il Park, Romain Murenzi, Mark J. T. Smith, [1996]

Wavelet-based point feature extractor for multisensor image restoration

Hui Henry Li, Yi-Tong Zhou, [1996]

Multiresolution moment-Fourier-wavelet descriptor for 2D pattern recognition

Tien D. Bui, Guangyi Chen, [1997]

Application of the principal wavelet component in pattern classification

Pirawat Watanapongse, Harold H. Szu, [1998]

Optimal waveform representation of shape and texture features for image classification

Arturo S. Dimalanta, Keith L. Phillips, [1997]

Mobile wavelet method: application to active contour modeling and surface reconstruction

Gerard Mozelle, Francoise Preteux, [1996]

5.0 Mathematical Methods in Image Recovery and Synthesis

5.1 Image Reconstruction and Restoration

Reconstruction of Images Made through Turbulent Media: Analysis and Comparison of Selected Methods

D. C. Watson, C.-C. C. Liu, J. L. Rapier, [1987]

Imaging correlography with sparse collecting aperatures

J. R. Fienup, Paul S. Idell, [1987]

Maximum Cramer-Rao bound: applications to the estimation of prior probabilities, image restoration, and the generation of quantum mechanics

B. Roy Frieden, [1987]

Adaptive image restoration filter

Nissim Ben-Yosef, Gavriel Feigin, [1987]

Mathematical aspects of impedance imaging, with emphasis on linear reconstruction algorithms

Margaret Cheney, David Isaacson, [1990]

Robust image restoration using adaptive kernel

Mohamed L. Hambaba, Inn-Tai Jaiu, [1990]

Maximum entropy image reconstruction from projections via Lagrange parameter analysis

Zhengrong Liang, [1990]

Computational aspects of regularized image reconstruction

John B. Abbiss, Bryan J. Brames, Michael A. Fiddy, [1990]

Redundancy in multidimensional deconvolution and phase retrieval

Rick P. Millane, [1990]

Overview of Bayesian methods in image reconstruction

Kenneth Lange, [1990]

Characteristics of feasible images obtained from real PET data by MLE, Bayesian, and sieve methods

Jorge Llacer, Alex C. Bajamonde, [1990]

Reconstruction of fast-scan MR images

Arthur F. Gmitro, Yu-Qing Chen, [1990]

5.1 Image Reconstruction and Restoration (*cont.*)

Two iterative methods for quantitative reconstruction of complex permittivity in microwave tomography

Line Garnero, Jean-Paul Hugonin, Ann Franchois, N. Joachimowicz, Christian Pichot, [1990]

Second-order statistics of astronomical speckle pattern used for image reconstruction

Claude Aime, Eric Aristidi, Henri Lanteri, Gilbert Ricort, [1990]

Image reconstruction using the phase variance algorithm

James R. Fienup, [1990]

Fast image reconstruction based on the regularized pseudoinverse of the imaging operator

John B. Abbiss, Jeffrey C. Allen, Richard P. Bocker, Harper J. Whitehouse, [1992]

New results in projection-type algorithms of use in image processing and reconstruction

Henry Stark, Elwood T. Olsen, [1992]

Tomographic reconstruction from partial angular views using Gibbsian models

Giovanni Jacovitti, Alessandro Neri, Alberto Laurenti, [1992]

Bayesian signal reconstruction from Fourier-transform magnitude and x-ray crystallography

Peter C. Doerschuk, [1992]

Image reconstruction from an undersampled focal plane using a sparse telescope array

Marsha J. Fox, David G. Voelz, Robert R. Shannon, [1993]

Overview of reconstruction algorithms for exact cone-beam tomography

Rolf Clack, Michel Defrise, [1994]

Statistical model for tomographic reconstruction methods using spline functions

Habib Benali, Jean-Pierre V. Guedon, Irene Buvat, M. Pelegrini, Yves J. Bizais, Robert Di Paola, [1994]

Tomographic image reconstruction and rendering with texture-mapping hardware

Stephen G. Azevedo, Brian K. Cabral, J. Foran, [1994]

Reconstruction of MR spectroscopic images using finite elements and spatial domain priors

Ernest M. Stokely, William B. Gunter, Donald B. Twieg, [1994]

Adaptive edge-preserving regularization for PET image reconstruction

Ming Fang, Chien-Min Kao, Ajit Singh, [1994]

Analytic recovery of transition probabilities in three-dimensional diffuse tomography

Sarah K. Patch, [1994]

5.1 Image Reconstruction and Restoration (*cont.*)

Quantitative methods for optical diffraction tomography

Mohammad H. Maleki, Anthony J. Devaney, [1994]

Noniterative methods for image deconvolution

Philip J. Bones, B. L. Satherley, C. R. Parker, Russell W. Watson, [1993]

Projection-based approach to the blind deconvolution problem

Yongyi Yang, Henry Stark, Nikolas P. Galatsanos, [1993]

Phase-retrieval algorithm for inverse synthetic aperture radar

James R. Fienup, [1993]

Submicron parameter determination using simulated annealing

Katherine Creath, Shiyu Zhang, [1993]

Face recognition by higher-order neural networks

Slawomir Skoneczny, Jaroslaw Szostakowski, Andrzej Stajniak, Witold Zydanowicz, [1995]

Fluorescence optical tomography

Jenghwa Chang, Randall Locke Barbour, Harry L. Graber, Raphael Aronson, [1995]

Globally convergent numerical method in diffusion tomography

Michael V. Klibanov, [1995]

Simultaneous reconstruction of absorption and scattering distributions in turbid media using a Born iterative method

Yuqi Yao, Yao Wang, Yaling Pei, Wenwu Zhu, Randall Locke Barbour, [1995]

Estimation of smooth integral functionals in emission tomography

Alvin Kuruc, [1995]

Information, language, and pixon-based image reconstruction

Richard Charles Puetter, [1996]

Optimization approach to 3D reconstruction from solution x-ray scattering data

Yibin Zheng, Peter C. Doerschuk, [1996]

5.1 Image Reconstruction and Restoration (*cont.*)

Image reconstruction from power spectral data

Ofer Hadar, E. Gresten, D. A. Weitzman, Dan Arbel, [1996]

Comparison of restoration algorithms on high-altitude infrared images

David A. Hazzard, Michael K. Giles, [1996]

New method for focused image recovery from image defocus

Tae Sun Choi, Seon O. Park, [1997]

Restoration of motion blurred images

Yitzhak Yitzhaky, Norman S. Kopeika, [1997]

General restoration filter for vibrated image restoration

Adrian Stern, Norman S. Kopeika, [1997]

Quantitative effects of using thin-plate priors in Bayesian SPECT reconstruction

Soo-Jin Lee, Ing-Tsung Hsiao, Gene R. Gindi, [1997]

Shape reconstruction in x-ray tomography

Ali Mohammad-Djafari, [1997]

Grouped coordinate descent algorithms for robust edge-preserving image restoration

Jeffrey A. Fessler, [1997]

Imaging experimental data from optical tomography by the elliptic systems method

Thomas R. Lucas, Michael V. Klivanov, Robert M. Frank, [1997]

Reconstruction of discontinuous solutions from blurred data

A. Neubauer, Otmar Scherzer, [1997]

Effects of truncation on deconvolution

Richard G. Lane, Roy Irwan, Philip J. Bones, [1997]

Bayesian framework for reconstructing missing data in color image sequences

Steven Armstrong, Anil Christopher Kokaram, Peter J. W. Rayner, [1998]

Regularization of the image division approach to blind deconvolution

Sergio Barraza-Felix, B. Roy Frieden, [1998]

Using intensity edges to improve parameter estimation in blind image restoration

Anna Tonazzini, Luigi Bedini, [1998]

5.1 Image Reconstruction and Restoration (*cont.*)

Hyperparameter estimation using hyperpriors for hierarchical Bayesian image restoration from partially known blurs

Nikolas P. Galatsanos, Vladimir Z. Mesarovic, Rafael Molina, Aggelos K. Katsaggelos, [1998]

Simultaneous image restoration and hyperparameter estimation by a cumulant analysis

Marc Sigelle, [1998]

Generalized support for constraint for three-dimensional reconstruction from incomplete Fourier spectra

Etienne P. Payot, Francoise Preteux, Yves Trouset, Regis Guillemaud, [1997]

5.2 Superresolution

Minimum cross-entropy methods in image superresolution

Mariappan S. Nadar, Philip J. Sementilli, Bobby R. Hunt, [1994]

Estimation techniques of the background and detailed portion of an object in image superresolution

Mariappan S. Nadar, Philip J. Sementilli, Bobby R. Hunt, [1994]

Efficient algorithm for superresolution in image processing

M. Lahzami, J. Laminie, Bernard Rouge, Abdellatif Seghier, [1994]

Multiresolution regularized least squares image reconstruction based on wavelet in optical tomography

Wenwu Zhu, Yao Wang, Yining Deng, Yuqi Yao, Randall Locke Barbour, [1995]

Wavelet transform and maximum entropy method

Eric Pantin, Jean-Luc Starck, [1995]

Image restoration in multisensor missile seeker environments for design of intelligent integrated processing architectures

Malur K. Sundareshan, Ho-Yuen Pang, Sengvieng A. Amphay, Bryce M. Sundstrom, [1997]

Reconstruction of step edges with subpixel accuracy in gray-level images

Jose Maria Sebastian y Zuniga, Oscar Reinoso, Rafael Aracil, David Garcia, Fernando Torres, [1997]

Subpixel resolution for target tracking

John T. Reagan, Theagenis J. Abatzoglou, John A. Saghri, Andrew G. Tescher, [1993]

Quantifying the super-resolution capabilities of the CLEAN image processing algorithm

Bobby R. Hunt, [1993]

5.2 Superresolution (*cont.*)

Two-stage superresolution technique using a piecewise-linear model

Alan H. Lettington, Qi He Hong, [1993]

Fast new approach to super-resolution

Hamid Fahimi, [1995]

5.3 Inverse Methods and Ill-Posed Problems

Axiomatic approach to certain inverse problems

Charles L. Byrne, Lee Jones, [1990]

Elementary inverse, energy velocity, and a generalized Sommerfeld theorem

Thomas M. Roberts, Michael Hobart, [1990]

Inverse-scattering theory applied to the synthesis of gradient-index optical waveguides

Lakshman S. Tamil, Arthur K. Jordan, [1990]

Profile inversion via successive overrelaxation

Ralph E. Kleinman, Peter M. van den Berg, [1990]

Quantum and statistical mechanical methods in classical direct and inverse scattering

Louis Fishman, [1990]

Nonlinear ultrasonic inverse-scattering tomography in polar coordinates

Brent L. Carruth, [1990]

Scattered wave inversion for weak scatterers by the method of image projections

Robert P. Porter, D. Rouseff, [1990]

Spectral decomposition of the exponential radon transform

Grant T. Gullberg, Gengsheng Larry Zeng, [1990]

Effects of long-term space environment exposure on optical substrates and coatings

Keith A. Havey, Arthur W. Mustico, John F. Vallimont, [1993]

Optical scatter due to impact effects

Alan J. Watts, D. R. Atkinson, C. R. Coombs, L. B. Crowell, Michael Black, [1993]

Inverse obstacle problem for the scalar Helmholtz equation

Giovanni F. Crosta, [1994]

5.3 Inverse Methods and Ill-Posed Problems (*cont.*)

Exact solutions for reflection and Dirichlet-to-Neumann operator symbols in direct and inverse wave propagation modeling

Louis Fishman, [1994]

Wavelet inversions of elastic wave data for nondestructive evaluation

David Matthew Patterson, Brian DeFacio, [1994]

Inverse problem of dynamically variable half-toning

Lev S. Sadovnik, Alexander A. Sawchuk, [1994]

Effects of adaptive refinement on the inverse EEG solution

David M. Weinstein, Christopher R. Johnson, John A. Schmidt, [1995]

Regularized method for the inverse problem of diffusion tomography

Gennady N. Erokhin, Michael V. Klibanov, Leonid N. Pestov, Nikolay L. Podkolodny, [1995]

Explicit inverse radiative transfer algorithm for estimating embedded sources from external radiance measurements

Lydia Katryn Sundman, Norman J. McCormick, [1995]

Geometry and ill-posed inverse problems

Pierre C. Sabatier, [1995]

Trade-offs between measurement residual and reconstruction error in inverse problems with prior information

Paul Hughett, [1995]

Singular value decomposition: a diagnostic tool for ill-posed inverse problems in optical computed tomography

Theo A.W.M. Lanen, David W. Watt, [1995]

Generating piece-wise continuous models for electromagnetic inverse problems

Hugo Hidalgo, Jose Luis Marroquin Zaleta, Enrique Gomez-Trevino, [1997]

Optimal treatment of ill-posed quasistatic source imaging problems

Fred Greensite, [1997]

Numerical scheme for solving the acoustical inverse scattering problem

Frank Wuebbeling, Frank Natterer, [1997]

5.3 Inverse Methods and Ill-Posed Problems (*cont.*)

Extensions of the cross-referencing method for choosing good regularized solutions to image recovery problems

John W. Hilgers, Barbara S. Bertram, Monica M. Alger, William R. Reynolds, [1997]

From deterministic to probabilistic approaches to solve inverse problems

Ali Mohammad-Djafari, [1998]

Statistical methods for 3D reconstruction of viruses using cryo electron microscopy data

Wen Gao, Peter C. Doerschuk, [1998]

Case study of nonlinear inverse problems: mammography and nondestructive evaluation

Olga Kosheleva, Sergio D. Cabrera, Roberto A. Osegueda, Carlos M. Ferregut, Soheil Nazarian, Debra L. George, Mary J. George, Vladik Kreinovich, Keith Worden, [1998]

Fast Bayesian estimation methods in emission tomography

Alvaro R. De Pierro, [1998]

Multispectral inverse problems in satellite image processing

Scott A. Starks, Vladik Kreinovich, [1998]

Kolmogorov complexity, statistical regularization of inverse problems, and Birkhoff's formalization of beauty

Vladik Kreinovich, Luc Longpre, Misha Koshelev, [1998]

Simultaneous multiple regularization parameter selection by means of the L-hypersurface with applications to linear inverse problems posed in the wavelet transform domain

Murat Belge, Misha E. Kilmer, Eric L. Miller, [1998]

Local inversion of the radon transform in the plane using wavelets

David Walnut, [1993]

6.0 Mathematical Methods in Geophysical Imaging

6.1 Seismic Wave Modeling and Inversion

Hybrid wave equation traveltime+waveform inversion of crosswell seismic data

Changxi Zhou, Wenying Cai, Yi Luo, Gerard T. Schuster, Siamak Hassanzadeh, [1993]

Hybrid methods of seismic data inversion

Simon Katz, Alex Beylin, [1993]

Can frequency domain inversion of seismic data work?

R. Gerhard Pratt, Zhong-Min Song, Paul R. Williamson, [1993]

Imaging the shape of an elastic heterogeneity by the T-matrix method

Xiao-fei Chen, Mohammad Al-Fares, Keiiti Aki, [1993]

Nonlinear inverse scattering for multiple attenuation

Arthur B. Weglein, [1993]

Objective functions for velocity inversion

William Woodbury Symes, [1993]

Linearized inversed scattering in the presence of caustics

A. P.E. ten Kroode, D.-J. Smit, Arie Verdel, [1994]

Estimating the energy source and reflectivity by seismic inversion

Susan E. Minkoff, William Woodbury Symes, [1994]

Born or Kirchhoff migration/inversion: what is the Earth's point of view?

Wafik B. Beydoun, Side Jin, [1994]

Nature of waves in deformable porous media

Pratap N. Sahay, [1995]

Wave propagation in elastic thin layers

Douglas J. Foster, Chuan-Sheng Yin, [1995]

Linearity, resolution, and covariance in GRT inversions for anisotropic elastic moduli

Carl Spencer, Maarten V. de Hoop, Robert Burridge, [1995]

Two-dimensional and three-dimensional asymptotic Green's functions for linear inversion

Andrzej J. Hanyga, Philippe Thierry, Gilles Lambare, Paulo S. Lucio, [1995]

6.1 Seismic Wave Modeling and Inversion (*cont.*)

Sensitivity of linearized seismic inversion to attenuation (Q)

Joakim O. Blanch, William Woodbury Symes, [1995]

Reflected wave modeling in heterogeneous acoustic media using the De Wolf approximation

Ru-Shan Wu, Lian-Jie Huang, [1995]

Velocity inversion and high-frequency asymptotics

Kidane Araya, Seongjai Kim, Clifford J. Nolan, William Woodbury Symes, [1996]

Inverse scattering internal multiple attenuation: an analytic example and subevent interpretation

Arthur B. Weglein, Ken H. Matson, [1998]

6.2 Wave Equation Migration and Stacking

Prestack imaging by coupled linearized inversion

Andreas Ehinger, Patrick Lailly, [1993]

Amplitude-preserving migration by weighted diffraction stacks

Joerg Schleicher, Eduardo Filpo Ferreira da Silva, Christian Hanitzsch, Martin Tygel, Peter Hubral, [1993]

Discrete Kirchhoff migration in the space-time domain

Ronald L. Silva, [1993]

Three-dimensional paraxial migration method without lateral splitting

Michel Kern, [1995]

Two migration methods based on paraxial equations in a 3D heterogeneous medium

Eliane Becache, Francis Collino, Michel Kern, Patrick Joly, [1995]

Seismic imaging operators derived from chained stacking integrals

Martin Tygel, Peter Hubral, Joerg Schleicher, [1995]

Migration to zero-offset in variable velocity media

Alexander Mihai Popovici, [1994]

Phase-shift migration with wave-packet algorithms

Charles C. Mosher, Douglas J. Foster, Ru-Shan Wu, [1996]

Amplitude-preserving MZO in laterally inhomogeneous media

Martin Tygel, Joerg Schleicher, Peter Hubral, [1996]

6.2 Wave Equation Migration and Stacking (*cont.*)

3-D prestack depth migration with an acoustic pseudo-screen propagator

Lian-Jie Huang, Ru-Shan Wu, [1996]

Three-dimensional prestack preserved amplitude migration: application to a 3D real dataset

Philippe Thierry, Gilles Lambare, Pascal Podvin, Mark Noble, [1996]

Decomposition and migration for multicomponent seismic data

Shengwen Jin, Ru-Shan Wu, Zaitian Ma, [1998]

Hybrid local Born/Rytov Fourier migration method

Lian-Jie Huang, Michael C. Fehler, Charles C. Burch, [1998]

Double-porosity modeling in elastic wave propagation for reservoir characterization

James G. Berryman, Herbert F. Wang, [1998]

6.3 Tomographic Methods

Tomographic reconstruction from incomplete data set with deterministic and stochastic constraints

Alessandro Neri, P. Carrion, Giovanni Jacovitti, A. Vesnaver, [1993]

Tomographic resolution without singular value decomposition

James G. Berryman, [1994]

Method of sequential projections on image and the problem of concordance between the information of ICP solution boundary behavior and the variation of the source parameters

Vladimir H. Reznik, [1995]

Seismic tomography and migration without ray tracing

Philippe O. Ecoublet, Satish C. Singh, Geoffrey M. Jackson, Chris H. Chapman, [1995]

Resolution limits for Crosswell migration and travel-time tomography

Gerard T. Schuster, [1995]

Stochastic technique for 2D tomographic reconstruction of rainfall fields through microwave measurements

Dino Giuli, Luca Facheris, S. Tanelli, [1996]

Some remarks on scattering theory and its application to seismic tomography

Lasse Amundsen, Arne Reitan, [1996]

6.3 Tomographic Methods (*cont.*)

Fast 3D two-point ray tracing for travel-time tomography

Fabrice Jurado, Patrick Lailly, Andreas Ehinger, [1998]

6.4 Statistical and Stochastic Methods

Mean field annealing approach to large residual-statics estimation

Peter William Cary, Warren Upham, [1993]

Quasi-Monte Carlo approach to efficient 3D seismic image reconstruction

Yongshe Sun, Gerard T. Schuster, K. Sikorski, [1994]

Stochastic technique for 2D tomographic reconstruction of rainfall fields through microwave measurements

Dino Giuli, Luca Facheris S. Tanelli, [1996]

6.5 Applications of Wavelet Theory in Seismic Imaging

Wavelet transform methods for geophysical applications

Douglas J. Foster, Charles C. Mosher, Siamak Hassanzadeh, [1993]

Quantitative dip bounds for the two-dimensional discrete wavelet transform

Jack K. Cohen, Tong Chen, [1993]

Frequency domain representations of wavelet transforms

Charles C. Mosher, Douglas J. Foster, [1995]

Wavelet-transform-based scale analysis of seismic and reservoir data

Charles C. Mosher, Manmath Panda, Douglas J. Foster, [1998]

Geophysical data analysis with wavelet transforms

Douglas J. Foster, Charles C. Mosher, F. David Lane, [1998]

Comparison of propagator decomposition in seismic imaging by wavelets, wavelet packets, and local harmonics

Ru-Shan Wu, Yongzhong Wang, [1998]

Multiscale analysis of well and seismic data

Felix J. Herrmann, [1998]

6.5 Applications of Wavelet Theory in Seismic Imaging (*cont.*)

Application of the wavelet transform in seismic data processing for the development of new noise reduction techniques

Fotios P. Kourouniotis, Robert F. Kubichek, Nicholas G. K. Boyd, Arun K. Majumdar, [1996]

Comparison of wavelet image coding schemes for seismic data compression

Anthony A. Vassiliou, Mladen Victor Wickerhouser, [1997]

Seismic imaging in wavelet domain: decomposition and compression of imaging operator

Ru-Shan Wu, Fusheng Yang, [1997]

Multiresolution tomographic inversion from an incomplete data set

Giovanni Jacovitti, Alessandro Neri, S. Puledda, [1997]

6.6 Numerical Methods and Implementation Issues

Parallel block inversion of geophysical data

Victor L. Pereyra, [1993]

Parallel finite-difference migration

Stewart A. Levin, [1993]

New numerical method of solving the acoustical scattering equation with applications to seismic wave equation tomography

Jerry M. Harris, Feng Yin, [1994]

Parallel I/O and computation for 3D post-stack depth migration

Charles C. Mosher, Calvin L. Joyner, [1994]

Three-dimensional depth migration by using finite-difference formulation of the linearly transformed wave equation

Daniel L. Mujica R., [1994]

Unconditionally stable explicit method for massively parallel solution of acoustic wave equations

Amir Fijany, Paul C. Messina, [1995]

Slowness matching finite difference method for traveltimes beyond transmission caustics

William Woodbury Symes, [1996]

6.6 Numerical Methods and Implementation Issues (*cont.*)

Accuracy analysis and numerical tests of screen propagators for wave extrapolation

Ru-Shan Wu, Maarten V. de Hoop, [1996]

Three-dimensional travel-time computation using the Fast marching method

Alexander Mihai Popovici, James A. Sethian, [1998]
